

Developed by: Joseph, Paige, and Kal

We're here today to present
a quick and easy way to get
quality recipes from quality
chefs around the world!

Concept

- As a food enthusiast, I want to be able to search for and review different recipes on a website, so that I can easily find new dishes to try and share with others.
- We want to create an expanding network for enthusiastic chefs and cooks.

Technologies!

- Bcrypt
- Dotenv
- Express (express-handlebars and express-session)
- MySQL2
- Sequelize

Roles!

- Joseph - Handlebars and routes, etc.
- Paige - Login and Logout functions, etc.
- Kal - Seeding and API, etc.

Trials and Tribulations

- Time constraints!
- Folder management!

Demo (temp)

The Future of Gourmet Guidance...

- More social features!
- Further API implementation.
- Profile customization.
- Further authentication.
